

a little off the top, please.

Got a waste oil problem? You know, that oily mess that sits on the surface of your process water. We've solved hundreds of thousands of problems just like yours—and worse.

Our "floating tube" oil skimmers are hard at work around the world...removing oil from water 24 hours a day, 365 days a year...with virtually no supervision or maintenance.

We've been doing this for over 30 years now. So we know what works. And what doesn't. That's why you should talk to us first. We'll match the right solution to your specific problem. That's what we do. Been there, solved that.

For the right solution to your waste oil problem, contact us today.
