Aftermarket Sales and Support

WESTECH[®]

Aftermarket Sales & Support

The WesTech Aftermarket Sales and Support Department is ready to supply replacement parts for your WesTech municipal, industrial, and minerals process equipment, as well as equipment provided by other manufacturers. All parts are available for regular or expedited delivery.

WesTech maintains extensive records of current and existing projects, including drawings and parts lists. We will go back to the records and make sure that we provide the exact replacement part you need.

The WesTech Aftermarket Sales and Support Department understands the importance of maximizing the life of your equipment and stands ready to support you in your preventative maintenance efforts.

The Key Attributes of a Preventative Maintenance Plan Are:

- **Proper lubrication of equipment**
- **Regular maintenance of equipment**
- **Routine inspection of all moving parts**
- **Stocking recommended wear parts**

Your Operations and Maintenance Manual contains maintenance instruction specific to your equipment.

Contact WesTech's Aftermarket Sales and Support Department for answers to questions on preventative maintenance.

WesTech is the sole provider of MEVA and OSNA parts in North America.

WesTech is an employee-owned company standing ready to meet your aftermarket and field service needs.

Field Service

WesTech's responsive and experienced field service professionals are ready to come to your site to install parts and equipment, assist with equipment startup, or diagnose and resolve a problem. WesTech provides field service technicians and process engineers that understand your equipment and are available anytime.

Field Services:

- **Onsite engineering and inspection**
- **Installation supervision**
- **Maintenance and repair**
- **Equipment retrofitting**
- **Plant upgrades**
- **Startup and training**

Experience in municipal, industrial, and minerals processes

Laboratory Services

Performance Testing and Process Optimization

WesTech offers complete laboratory testing facilities to assist in your project planning. WesTech's laboratory technicians are specialists in filtration, sedimentation, and flotation. Careful testing and analysis of your sample can provide the answers to your most difficult process problems, helping to establish design parameters and size equipment based upon bench-scale testing results.

Comprehensive reports are sent to you and the information is then used to discuss the most effective water treatment options with WesTech process experts. WesTech bench-scale units are also available for rental or purchase for use at your testing facility.

Retrofit Drives

Alleviate the maintenance headaches associated with rebuilding your existing drive and let a WesTech replacement drive provide you with a cost-effective solution. With countless fabrication possibilities, WesTech can provide direct, bolt-in replacement drives for your old or failed drives, no matter the original manufacturer.

WesTech replacement drives offer the advantages of the same efficient components and quality manufacturing as WesTech standard drives, providing your mechanism with a longer life and lower maintenance requirements.

- **Restore performance strengths**
- **Upgrade or retrofit clarifiers and thickeners**
- **Retrofits for all mechanism types**
- **Extend equipment service years**
