

Tarsco Bolted Tank®
a TF Warren Company

Full service provider of liquid and dry bolted storage tank systems

Concho Rural Water Corporation's (CRWC) water treatment plant supplies water to San Angelo, TX residents and businesses. It's ongoing goal is to provide clean, safe water to its customers.

As residential subdivisions expand, the demand for clean potable water has increased. In order to meet this demand and comply with the Texas Commission on Environmental Quality regulations, the CRWC contracted Tarsco Bolted Tank to construct one new potable water tank that replaced two other aging tanks. The scope of work on this project included:

- Engineering and design
- Manufacturing
- Erection
- Coating (Caribbean Blue)
- (1) Potable water tank 27.7' x 24.6'
- 104,099 gallons water capacity

With the completion of this new tank, the CRWC has now utilized Tarsco Bolted Tank to provide a total of six (6) potable water tanks and prefers that no sub-contractors be involved in any of the tank projects. Utilizing only Tarsco Bolted Tank personnel, this tank project was completed on time and within budget. In every project Tarsco Bolted Tank undertakes, safety is always a high priority, and this project experienced no safety incidents.

The Concho Rural Water Treatment Plant continues to monitor the quality of its water to ensure it's always safe to drink and that it meets or exceeds public drinking water standards.

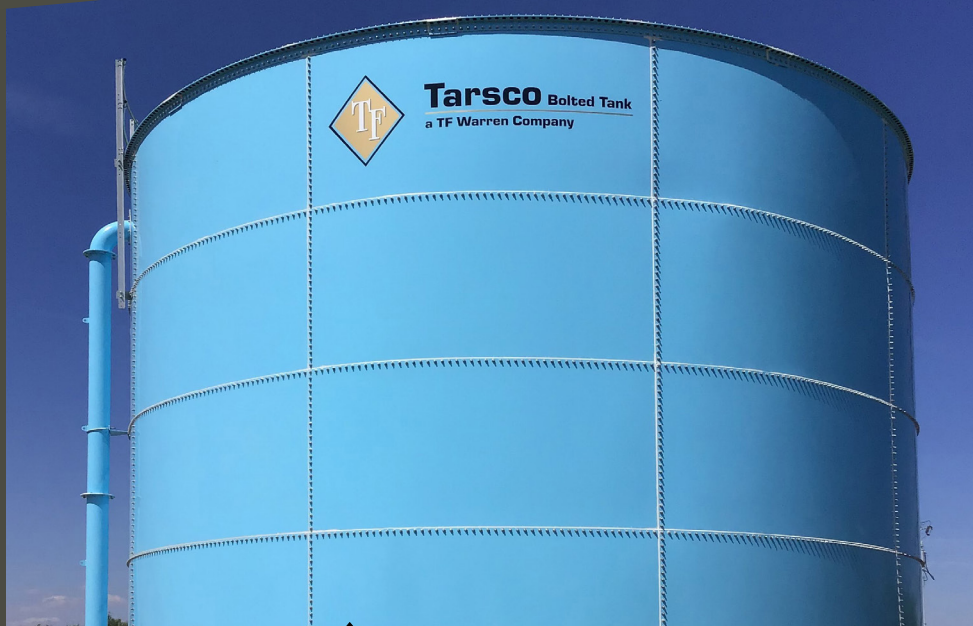

"The Tarsco Bolted Tank company manufactures and installs a great tank for a reasonable price. I like that each tank I order is built specifically for our company's needs. The process from start to finish is painless. I would recommend Tarsco Bolted Tank to anyone."
